# of Adults	# of Children	# and kinds of Pets	
		Person who smokes in home 🖵 Yes 🛛 No	
		Language(s) spoken in home	
Assessment Notes:			
Risk Measurements			
Imminent Harm to self, family, anima	s, public:		
		at of Condemnation:	
 Awareness of clutter Willingness to acknowledge clutter an Physical ability to clear clutter Psychological ability to tolerate interv Willingness to accept intervention ass 	nd risks to health, safety and ability to re rention istance		
Capacity Notes:			
Post-Assessment Plan/Referral			

HOMES[®] Multi-disciplinary Hoarding Risk Assessment

Instructions for Use

- **HOMES** Multi-disciplinary Hoarding Risk Assessment provides a structural measure through which the level of risk in a hoarded environment can be conceptualized.
- It is intended as an *initial* and *brief* assessment to aid in determining the nature and parameters of the hoarding
 problem and organizing a plan from which further action may be taken-- including immediate intervention, additional
 assessment or referral.
- HOMES can be used in a variety of ways, depending on needs and resources. It is recommended that a visual scan of the environment in combination with a conversation with the person(s) in the home be used to determine the effect of clutter/hoarding on Health, Obstacles, Mental Health, Endangerment and Structure in the setting.
- The Family Composition, Imminent Risk, Capacity, Notes and Post-Assessment sections are intended for additional information about the hoarded environment, the occupants and their capacity/strength to address the problem.

©Bratiotis, 2009. [The HOMES Assessment was developed in conjunction with the Massachusetts Statewide Steering Committee on Hoarding. Information about the assessment can be found in Bratiotis, Sorrentino Schmalisch, & Steketee, 2011. The Hoarding Handbook: A Guide for Human Service Professionals. Oxford University Press: New York.]
